Introduction

The Oil and Hazardous Substance Release Prevention and Response Fund (Response Fund) was created by the legislature in 1986 to provide a readily available funding source to investigate, contain, clean up and take other necessary action to protect public health and welfare and the environment from the release or threatened release of oil or a hazardous substance. Alaska Statute 46.080.030 states: “ It is the intent of the legislature and declared to be the public policy of the state that funds for the abatement of a release of oil or a hazardous substance will always be available.” (SLA 1986 Sec.1 Ch. 59).

Statutes governing the Response Fund were amended in 1989, 1990, 1991, 1994, and 1999. Generally, these amendments increased the purposes for which the Response Fund could be used and increased the Department of Environmental Conservation’s (DEC) reporting requirements. In addition, the 1994 amendment made major changes to the Response Fund structure by dividing the Response Fund into two separate accounts: the “response” account and the “prevention” account. The diagram on page 3 illustrates the current structure of the Response Fund. The 1999 amendment changes the requirement for an annual report to the legislature on the status of the fund to a biennial report.

Response Account

The Response Account may be used to finance the state’s response to an oil or hazardous substance release disaster declared by the governor, or to address a release or threatened release that poses an imminent and substantial threat to the public health or welfare, or to the environment. To access the Response Account for any incident other than a declared disaster, DEC must notify the governor and the Legislative Budget and Audit Committee within 120 hours of using the money from this account.

The Response Account is financed with a two cents per barrel surcharge and money recovered from responsible parties. The surcharge is levied on each taxable barrel of oil produced in the state. The surcharge is suspended when \$50 million is reached from the combined balances of the surcharge account, the response mitigation account and the unreserved and unobligated balance in the Response Account itself. The \$50 million balance was exceeded in December, 1994 and the surcharge was suspended as of April, 1995.

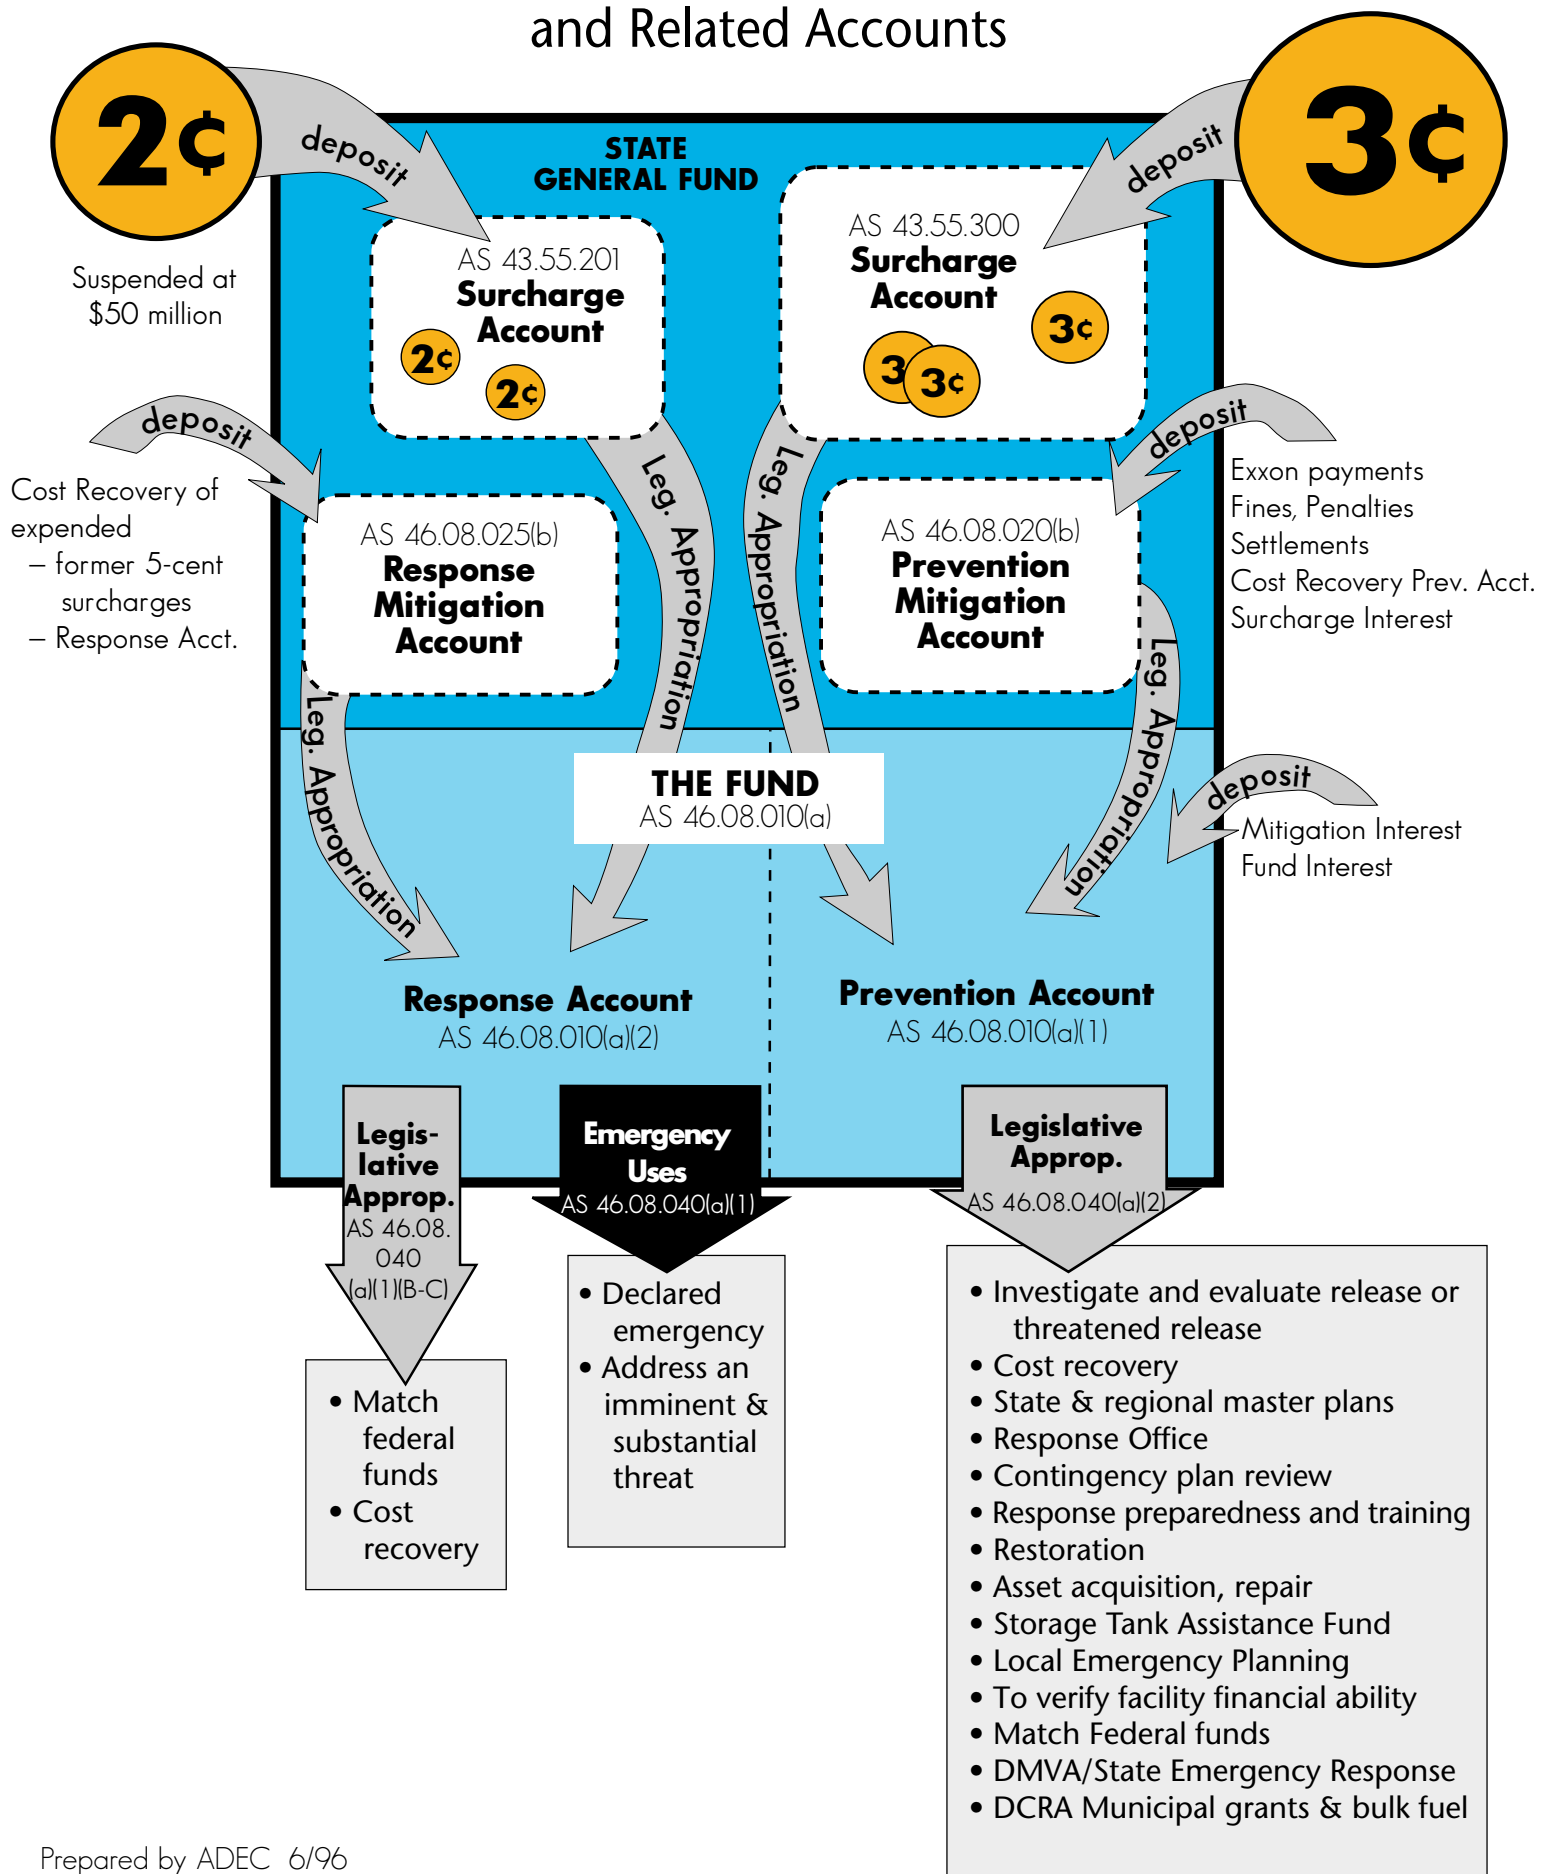

Prevention Account

The Prevention Account may be used to respond to oil and hazardous substance releases that have not been declared a disaster by the governor. In addition, the Prevention Account may be used to fund Alaska’s oil and hazardous substance release and prevention programs. The legislature appropriates money from the Prevention Account to support DEC and other state agencies for spill prevention and preparedness planning activities (AS 46.08.040(a)(2)).

The Prevention Account is financed with a three cent per barrel surcharge and fines, settlements, penalties and interest. The surcharge is levied on each taxable barrel of oil produced in the state.

Note 1: These amounts include interagency receipts within the response fund.

Note 2: These amounts include reimbursable federal and interagency activity within the response fund.

-

Table B summarizes, by incident or site, deposits made in Fiscal Year 2003 and 2004 to the prevention and response mitigation accounts. All monies collected by the department as cost recovery, fines, penalties or settlement payments related to activity funded by the Oil and Hazardous Substance Release Prevention and Response Fund (Response Fund) are deposited in the mitigation accounts. These amounts do not include settlements that involved a Supplemental Environmental Project undertaken directly by the spiller.

Table C summarizes the various funding sources appropriated to the Oil & Hazardous Substance Release Prevention and Response Fund (Response Fund). "Program Receipts" are revenues collected from an outside party for specific program expenditures. "Mitigation Revenue" includes interest earned on surcharge deposits, cost reimbursement, fines, penalties or settlement payments from parties financially responsible for incidents or sites for which the state expended money from the Response Fund. "Oil Surcharge Revenue" represents collection in the prior year of the conservation surcharge imposed on oil produced in the state.

Table C

Revenue Sources

(In Thousands)

Fiscal Year	Program Receipts	Mitigation Revenue	3 Cents Oil Surcharge Revenue	2 Cents Oil Surcharge Revenue ^{Note 1}	Other General Fund	Total
FY00	-	\$5,368.1	\$11,075.5	-	- \$	16,443.6
FY01	-	\$5,803.4	\$9,536.0	-	- \$	15,339.4
FY02	-	\$6,194.7	\$9,295.2	-	- \$	15,489.9
FY03	-	\$6,490.0	\$9,597.0	-	- \$	16,087.0
FY04	-	\$3,157.0	\$9,232.9	-	- \$	12,389.9
FY05	-	\$1,392.8	\$9,052.5	-	- \$	10,445.3

Note 1: AS 43.55.221 (d) provides that imposition and collection of the \$.02 per barrel of oil surcharge levied and collected be suspended under AS 43.55.201 when the cumulative balance of these accounts equals or exceeds \$50,000,000.00. The suspension of the imposition and collection of the surcharge went into effect as of April 1, 1995.

Table D lists contracts the department signed that are associated with response activities funded by the Oil and Hazardous Substance Release Prevention and Response Fund and which exceeded \$10,000 in Fiscal Year 03 & 04 payments.

Table H, I, and J list all the sites inventoried in the Department of Environmental Conservation's contaminated sites and leaking underground storage tank sites database as of June 30, 2004.

Table H summarize the numbers of active sites by location and by priority ranking based on the threats to the public health or welfare or to the environment. The database contains the following totals for each priority category.

High Priority	1029
Medium Priority	740
Low Priority	486
Unranked	133
Total Active Sites	<u>2388</u>

Table I lists all DEC Inventory of active Contaminated and Leaking Underground Storage Tanks sites alphabetically by location.

Table J lists all DEC Inventory of closed Contaminated and Leaking Underground Storage Tanks sites alphabetically by location.

Appendix 1: Community Spill Response - No costs incurred for communities in Fiscal years 2003 and 2004.

Appendix 2: Project Summaries - This appendix summarizes information for contaminated sites or pollution incidents for which the department made direct expenditures of \$10,000.00 or more during Fiscal year 2003 and 2004 from the Oil and Hazardous Substance Release Prevention and Response Fund. Indirect expenditures, expenditures paid from other sources and expenditures for budgeted legal services provided by the Department of Law are not included. Direct department response activities involve cleanup, control, containment, investigation and oversight.

Project/Site Name: **6-Mile Groundwater Monitoring**

Location: Fairbanks/North Pole

Project Manager: Douglas Bauer

Site ID Number: 1987310924701

Tel: (907) 451-2192

Tracking Number: 14621570

Situation:

In 1995/1996, an area-wide trichloroethylene (TCE) groundwater plume was discovered in the Six-Mile Richardson Highway area. The plume is over a mile in length, up to 1200 feet wide, and up to 100 feet in depth. It extends in a northwesterly direction from south of the New Richardson Highway to the Six-Mile Village Subdivision area.

The plume impacted fifteen residential drinking water wells. The homeowners were given individual grants in 1995 to install water treatment systems (e.g., carbon filters) to remove the TCE from their drinking water.

Individual site investigations are being conducted concurrently with the area wide groundwater investigation. Site investigations at the McCall, Holder, Walsky, and 6-Mile Truck Shop properties indicate that there are multiple source areas where TCE was discharged to the ground. The individual source areas are creating groundwater plumes that eventually merge together to form the area-wide plume. The source areas appear to be located on the Holder and Walsky properties.

In 1996, an annual long-term groundwater program was instituted. Additional permanent groundwater monitoring wells were installed throughout the area. A series of permanent groundwater monitoring wells and a selected number of residential wells have been sampled annually since 1996 to monitor the area-wide plume. The results are analyzed, published, and distributed to interested parties.

FY 03 Actions:

Continue the annual groundwater monitoring and the residential well testing and filter system maintenance program. Install several new monitoring wells in the distal portion of the regional groundwater plume to understand why concentration levels in two wells are not decreasing.

FY03 Response Fund Expenditures: \$ 83,221.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Monitored the groundwater quality of 26 wells and performed filter maintenance at 14 residential water systems.

FY04 Response Fund Expenditures: \$ 73,918.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

Continue the long-term monitoring program and testing (and filter maintenance) of residential water wells systems. Estimated cost is \$30,000 for long-term monitoring and \$20,000 for residential water wells filter maintenance.

Estimated FY 05 Costs: \$50,000

Project/Site Name: **ADF&G King Salmon Facility**

Location: King Salmon, Alaska

Project Manager: David Pikul

Site ID Number: 2001250122705

Tel: (907) 269-7551

Tracking Number: 14111560

Situation:

The ADF&G King Salmon facility had an underground heating oil tank that was suspected of possibly leaking and posing a risk to ground and/or surface water. During installation of a water line, contaminated soil was encountered.

FY03 Actions:

No action in FY03.

FY04 Actions:

Conducted a site investigation and identified contaminated soil and/or groundwater. There was minor contamination identified but it is not considered to pose a risk.

FY04 Response Fund Expenditures: \$ 22,721.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

There is no future investigation or cleanup action proposed.

Project/Site Name: **ADOT&PF Aniak Airport**

Location: Aniak, Alaska

Project Manager: David Pikul

Site ID Number: 1992250133501

Tel: (907) 269-7551

Tracking Number: 14103460 &
14978960

Situation:

The Aniak Airport has a number of environmental issues associated with hazardous substance contamination. There are numerous Alaska Department of Transportation & Public Facilities (ADOT&PF) sites. Maintenance Station; Bldg. 301; Runway Apron and the City of Aniak lease lot are identified as areas of concern. The City of Aniak lease lot poses a risk based on improper storage area of batteries, a tanker car that held used oil, totes containing containers of unknown substances, several stained areas, improperly stored drums, and floor drains connected to an on-site leach field which reportedly received any and all waste liquids from the maintenance shop. The drinking water well is situated approximately 25 feet from the above ground fuel storage and dispenser and sheening has been reported on water in the shop toilet. Groundwater has elevated levels of petroleum hydrocarbons.

FY 03 Actions:

The Aniak Airport facility was reviewed for hazardous substance contamination and impacts to groundwater. There were numerous sites previously addressed as separate areas but the FY03 effort was intended to assess the facility on an “area wide” approach. Site status was documented and soil samples collected from known and potential source areas to identify contaminants of concern for the purpose of site characterization and to assist with future cleanup decisions. The City of Aniak’s (Shop Building) drinking water well and other airport monitoring wells were located and assessed for current status.

FY03 Response Fund Expenditures: \$ 32,158.00

FY03 Cost Recovery: \$ 0.00

FY 04 Actions:

Drinking water and wells were identified and samples were taken. There were some monitor wells decommissioned and new ones added to fill data gaps. Contaminated soil (5000 cubic yards) from the former MarkAir facility was land spread along the runway.

FY04 Response Fund Expenditures: \$ 3 , 63.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to monitor the “area-wide” groundwater and address areas that pose an imminent risk (e.g., city shop).

Estimated FY05 Costs: \$65,000.00

Project/Site Name: **ADOT&PF Cold Bay Airport**

Location: Cold Bay, Alaska

Project Manager: David Pikul

Site ID Number: 1995250120501

Tel: (907) 269-7551

Tracking Number: 14103760

Situation:

An area wide review of the contaminated sites at, and in the vicinity of, the Cold Bay Airport was conducted. The purpose of the study was to identify State, Federal, and private sites at the airport and prepare a Geographical Information Systems (GIS) map and database of the information.

FY03 Actions:

No action in FY03.

FY04 Actions:

The FY04 work was to research and prepare the map and data for the contaminated sites at the Cold Bay Airport.

FY04 Response Fund Expenditures: \$ 14,256.11

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to further refine the data and include other data sets that were not included in the original work (e.g., drinking water wells).

Estimated FY05 Costs: \$45,000.00

Project/Site Name: **ADOT&PF Cold Bay – Lower Tank Farm**

Location: Cold Bay, Alaska

Project Manager: David Pikul

Tel: (907) 269-7551

Site ID Number: 1994250115301

Tracking Number: 14990660

Situation:

Alaska Department of Transportation & Public Facilities (ADOT&PF) operated two fuel storage tank farms (the upper and lower) near the dock at Cold Bay, Alaska. The lower tank farm previously consisted of an above ground storage tank (AST) containment area near the city dock in Cold Bay, owned and operated by ADOT&PF. Frosty Fuels Inc. (FFI) was also located and operated in the lower tank farm area.

FY03 Actions:

No action in FY03.

FY04 Actions:

Soil was excavated from the lower tank farm and landspread at the upper tank farm. A soil characterization was taken from the excavated soil.

FY04 Response Fund Expenditures: \$ 33,832.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to sample the landspread area and make a decision on long term monitoring.

Estimated FY05 Costs: \$ 45,000.00

Project/Site Name: **ADOT&PF Cordova Locke Salvage Yard**

Location: Mile 1 Cabin Lake Road, Cordova, Alaska

Project Manager: David Pikul

Tel: (907) 269-7551

Site ID Number: 1990240129803

Tracking Number: 14651260

Situation:

Mr. Jim Locke illegally occupied the site for almost thirty years prior to his death in 1996. Some of the items that Mr. Locke accepted into the salvage yard included: complete automobiles, auto parts, small engines, drums of oil and unknown contents, batteries, and miscellaneous debris (possible PCB transformer). It has been estimated that there was 600+ tons of metal debris. The property is owned and managed by the State of Alaska, Department of Transportation & Public Facilities (ADOT PF) as part of the Cordova Airport facility. It was littered with the vehicles, structures, various forms of solid waste, and drums of unknown product. The property encompasses approximately 13 acres of land, of which 7 to 8 acres were covered by debris. The debris was stored on the site in a manner such that the solid waste and hazardous waste were interspersed with each other. The solid and hazardous waste has been removed and properly disposed. The assessment of impacts to the soil and ground and/or surface water continues. Ecology of the site includes an unnamed stream running between the former residence and the bulk area of the salvage yard. Small fry have been observed in the stream. A site visit and preliminary assessment were conducted by DEC and EPA contractors.

FY 03 Actions:

The site investigation for soil and groundwater contamination was conducted by an EPA contractor for possible Comprehensive Environmental Responses Compensation and Liability Act of 1980 (Superfund Act or CERCLA) and Resource Conservation and Recovery Act (RCRA) issues. This information was reviewed by DEC and incorporated into a Scope of Work to conduct further site characterization work. Cost proposals for additional investigation work were solicited and site characterization work plans were reviewed and commented on.

FY03 Response Fund Expenditures: \$ 62,731.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Conducted groundwater sampling and verified water quality conditions. There were areas of groundwater contamination identified that will focus future site characterization work

FY04 Response Fund Expenditures: \$ 62,741.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The FY 04 work identified areas for additional investigation. The FY 05 work plan is to install soil borings that will further characterize soil contamination and the borings will be developed into monitor wells to verify the nature and extent of groundwater contamination. The FY 04 information does not indicate a substantial risk to the environment. Additional data gathered in FY 05 will allow DEC to make a risk management decision.

Estimated FY05 Costs: \$ 45,000.00

Project/Site Name: **ADOT&PF Maintenance Station, Soldotna**

Location: Soldotna

Project Manager: Don Fritz, Anchorage

Site ID Number: 1993230122905

Tel: (907) 262-5210 X245

Tracking Number: 14966760

Situation:

The former Alaska Department of Transportation & Public Facilities (ADOT&PF) Soldotna Maintenance Facility was operated in the central Kenai Peninsula between 1954 and 1999. It was used for heavy equipment storage, fueling, maintenance and repair. There was also salted sand, crack sealer, and road paint stored on site. There were also regulated and non-regulated underground storage tanks (USTs) that contained gasoline, diesel fuel, heating oil and waste oil. In 1999, the facility was re-located and all buildings were removed. The drinking water well was abandoned but monitoring wells still remain on the property.

Investigation of the site identified chloride and petroleum hydrocarbon contamination in the soil and groundwater. The petroleum contamination was primarily attributed to leakage of the regulated and non-regulated USTs on the site and spills/releases from the dispensers and improper waste handling/disposal activities. There was approximately 4,500 cubic yards of contaminated soil excavated and thermally treated.

There are documented impacts to the Kenai River sediments from the migration of salt. There were also low levels of petroleum contamination encountered in sediment samples but they were similar to samples taken upstream and downstream of the site. The property was transferred to the City of Soldotna in 2003. ADEC will require the City of Soldotna to continue a groundwater monitoring program. Based on the results, ADEC will determine trends in contaminant concentrations and whether additional cleanup is required.

FY03 Actions:

Groundwater monitoring was continued on a semiannual basis. Contaminant levels still reflect elevated chloride levels from former salt piles.

FY03 Response Fund Expenditures: \$ 23,159.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Groundwater monitoring continued on a semiannual basis. Contaminant levels still reflect elevated chloride levels from the former salt piles, and elevated levels of petroleum constituents exist in some of the monitor wells.

FY03 Response Fund Expenditures: \$ 4,782.00

FY03 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts

The City of Soldotna will continue groundwater monitoring on a semiannual basis. No further Response Fund expenditures are anticipated.

Project/Site Name: ADOT&PF Peger Road Maintenance Facility

Location: 2301 Peger Road, Fairbanks, AK

Project Manager: Douglas Bauer

Tel: (907) 451-2192

Site ID Number: 1991310107201

Tracking Number: 14800760

Situation:

For over forty years the Peger Road facility has been used as the focal point for operations, maintenance, design, and construction for the interior and northern regions of the State of Alaska. Past practices at the facility have resulted in extensive soil and groundwater contamination at the site, some of which appears to have migrated off-site, potentially impacting neighboring properties.

ADEC conducted a site assessment in 1998, which included the collection of soil and groundwater samples throughout the facility. Petroleum and chlorinated solvent contamination were measured above cleanup levels in soil and groundwater at several locations. Based on this investigation, ADEC determined that two separate groundwater contaminate plumes originate at the facility and are impacting nearby properties. Private residences were contacted to locate private wells. Identified private wells were subsequently sampled for TCE to determine if residents were exposed to the solvent. All sample results indicate that private wells have not been impacted by TCE contaminated groundwater migrating from the facility. ADEC installed additional monitoring wells in 1999, down-gradient and offsite from the facility, to determine the extent of TCE and benzene groundwater contamination.

ADEC has implemented a quarterly groundwater sampling program to monitor onsite and offsite contaminant impact to groundwater. The initial site characterization effort (Fall 1999) describing the extent of chlorinated solvent and benzene groundwater and soil contamination at the facility did not sufficiently define the extent of plume boundaries. As such, additional monitoring wells were installed and supplemental site characterization was completed (Spring 2000). A site characterization report was submitted for ADEC's review and approval.

ADEC continued to investigate the extent of contamination at the site. Data gaps were filled to better identify groundwater plume boundaries. Off-site private and on-site monitoring wells were monitored. Surrounding property contamination was reviewed and potential contributors to the groundwater contaminant plume identified.

FY03 Actions:

Monitoring wells were installed on the northwest perimeter of the site to define the lateral and vertical extent of the groundwater plume as it migrates off site. Temporary direct push wells were installed to define the lateral and vertical extent of the off site plume and to locate permanent monitoring well locations. Additional off-site permanent monitoring wells were installed.

FY03 Response Fund Expenditures: \$ 96,825.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Installed three deep monitor wells and continued groundwater monitoring. In addition, approximately 1000 cubic yards of low level TCE soil was excavated and treated (landspread) off site. The US Geological Survey study to enhance the natural degradation of chlorinated compounds at Peger Road was completed.

FY04 Response Fund Expenditures: \$ 192,737.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The FY 05 proposed work plan is to continue the long-term monitoring program and conduct pilot studies to determine whether natural attenuation versus enhanced is applicable at the site.

Estimated FY05 Costs: \$ 75,000.00

FY05 Projected Actions and Expenditure Amounts:

The FY 05 proposed work plan is to continue the long-term monitoring program and conduct pilot studies to determine whether natural versus enhanced attenuation is applicable at the site.

Estimated FY 05 Costs: \$75,000.00

Project/Site Name: **Aniak Middle School/WACS**

Location: Aniak, Alaska

Project Manager: John Halverson

Site ID Number: 198925X 902506

Tel: (907) 269-7545

Tracking Number: 14113160

Situation:

The US Air Force constructed a White Alice Communications System site in Aniak during the Cold War. The facility was shut down in 1978 and transferred to the Kuspuk School District for use as a school in 1979. The property is owned by Alaska Department of Transportation & Public Facilities and is currently used as a middle school. Polychlorinated biphenyl (PCB) contaminated soil has been documented at the site. In the fall of 1997 the Corps of Engineers covered PCB contaminated soil with a liner and gravel as a temporary cap and cleaned the inside of the school to prevent direct exposure to PCBs. Between 1998 and 2001 DEC had a contractor conduct site characterization work, conducted an interim cleanup action, and negotiated with the Department of Justice and the Corps of Engineers in an effort to establish a cost sharing agreement covering the necessary cleanup. Approximately 820 tons of PCB contaminated soil were removed and sent to a permitted disposal facility. Data compiled to date indicates up to 1500 cubic yards of soil containing more than 1 mg/kg PCB remains on-site.

FY03 Actions:

No action in FY03.

FY04 Actions:

DEC contractors conducted limited additional sampling beneath a portion of the school to further delineate the extent of contaminated soil, prepared a feasibility study to evaluate cleanup alternatives and recommend an appropriate alternative, and prepared a cleanup plan. Potentially Responsible Party (PRPs) letters were issued to prior Air Force contractors that operated the site (AT&T, Alascom, ITT Lucent) requesting they conduct the necessary cleanup and notifying them the State planned to do so during FY04/05 unless they did. These PRPs requested the State provide them additional time to review all the data, conduct additional sampling and evaluate additional cleanup alternatives.

FY04 Response Fund Expenditures	\$19,762.73
---------------------------------	-------------

*FY04 Cost Recovery	\$ 0.00
---------------------	---------

* Cost recovery bills for ~\$900,000.00 for work performed prior to 2001 have been sent to the Dept. of Justice, AT&T, Alascom, and ITT. Legal agreements have been negotiated to stay the statute of limitations during on-going negotiations

FY05 Projected Actions and Expenditure Amounts:

Negotiation with the PRPs is expected to result in a settlement agreement with the PRPs taking the lead on the remaining cleanup and reimbursing the State for prior costs. If this is unsuccessful DEC anticipates completing the cleanup during FY05 and pursuing legal action to recover all oversight and cleanup costs.

Estimated FY05 Cost:	\$25,000.00 (if a settlement agreement is reached)
----------------------	--

Project/Site Name: **Chevron Refinery**
Location: Nikiski, Alaska
Project Manager: Don Fritz, Anchorage
Site ID Number: 1987230119802

Tel: (907) 262-5210 X245
Tracking Number: 14944260

Situation:

The former Chevron refinery in Nikiski operated as a petroleum refinery from 1963 to 1991. The industrial operations located on the site impacted the soil and groundwater with hazardous substance contamination. There were numerous site investigations conducted at the facility in response to a petroleum seep identified in 1987 at the base of the bluff adjacent to Cook Inlet. Several efforts were undertaken to intercept the contamination plume including a 660 foot groundwater recovery system (GWRS). The GWRS was originally installed in 1994 with a 220 foot extension in 1997 when assessment activities determined that the system was not capturing all of the contamination.

FY03 Actions:

Continued product recovery and groundwater monitoring at the site. There were also efforts to sample the sediments and surface water below the seawall to document any impacts.

FY03 Response Fund Expenditures: \$ 34,063.00
FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Core water samples were taken in the sediments to check the efficiency of the groundwater recovery system.

FY04 Response Fund Expenditures: \$ 17,527.87
FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to continue to monitor ground and surface water and sediment sampling to verify water quality conditions.

Estimated FY05 Expenditures: \$ 45,000.00

Project/Site Name: **Eskimo Creek Seep**

Location: King Salmon, Alaska

Project Manager: Rich Sundet

Site ID Number: 1994250122801

Tel: (907) 269-7578

Tracking Number: 14875960

Situation:

The Alaska Department of Environmental Conservation (ADEC) was contacted in 1994 regarding a petroleum hydrocarbon seep into Eskimo Creek in the vicinity of Eddie's Fireplace Inn. The source(s) of contamination was unknown but sample analysis indicated a diesel range fuel product. Possible suspect areas included a former heating oil tank buried behind Eddie's Fireplace Inn and possible debris and/or runoff from the King Salmon Airport.

ADEC assumed the lead role and conducted soil and groundwater investigations at Eddie's Fireplace Inn to identify possible source areas of the seep product. The former heating oil tank was suspected as a source and recovery wells were installed to intercept product before it enters the creek. Soil contamination at (and adjacent to) the seep area continue to cause sheen and product release to the creek.

ADEC installed an interception trench and recovery system. The soil excavated from the trench was transported off site for storage/treatment.

FY03 Actions:

ADEC excavated the soil and sediment area adjacent to the seep and replaced it with clean fill material. The trench will continue to be monitored and any product will be collected and removed from the site. The excavated soil will be transported off site for storage/treatment. Groundwater monitoring will continue to determine the effectiveness of treatment.

FY03 Response Fund Expenditures: \$ 64,768.00

FY03 Cost Recovery: \$ 2,800.00

FY04 Actions:

Continued operation and maintenance of the interception trench and collected free phase product. The groundwater and sediment was sampled to determine water quality conditions.

FY04 Response Fund Expenditures: \$ 36,980.00

FY04 Cost Recovery: \$ 2,400.00

FY05 Projected Actions and Expenditure Amounts:

The FY05 proposed work is to continue operation and maintenance of the interception trench in order to collect any free phase product. The groundwater and sediment will be sampled to determine water quality conditions. Future actions will be dependent on monitor results.

Estimated FY05 Costs: \$ 45,000.00

Project/Site Name: **FAA Statewide**

Location: Various

Project Manager: Eileen Olson

Site ID Number: Various

Tel: (907) 269-7527

Tracking Number: 14996860

Situation:

The Federal Aviation Administration (FAA) owns and/or operates properties associated with airports in Alaskan communities and operates navigational aids at remote sites statewide. Many FAA sites are being decommissioned or the acreage is being reduced, as a result of federal policy and technological changes. Surplus land is normally transferred from FAA management to the Bureau of Land Management, which then may transfer the property to other entities that have an interest. Soil and groundwater contamination has been documented at over 50 FAA sites. The releases are primarily associated with petroleum hydrocarbons (diesel and gasoline) and originate from storage tanks, surface spills, floor drains, septic systems, drum storage areas, historic dumps, and extensive fuel distribution systems. There is also contamination associated with metals, solvents, PCB and pesticides.

DEC provided oversight of site investigations and cleanup actions at numerous FAA sites. This included review of workplans, reports and other major submittals for FAA facilities at Bettles, Bethel, Biorka Island, Cape Yakataga, Cordova, Iliamna, Kenai, Lake Minchumina, McGrath, Moses Point, Northway, Shuyak Island, Strawberry Point (on Hinchinbrook Island), Tanana, and Woody Island. Sites inspections were conducted at Shuyak Island, Lake Minchumina, Moses Point and Tanana.

FY03 Actions:

DEC continued to provide oversight of the high priority FAA sites. Site investigation and/or interim cleanup actions for 2003 were Biorka Island, Bettles, Cape Yakataga, Cold Bay, Fort Yukon, Iliamna, Kenai, King Salmon, Lake Minchumina, Level Island, McGrath, Middleton Island, Moses Point, Nome, Northway, Skwentna, Talkeetna, Tanana, and Unalakleet.

FY03 Response Fund Expenditures: \$ 22,737.00

FY03 Cost Recovery: \$ 19,516.00

FY04 Actions:

FAA Cleanup activities for Biorka Island, Bettles, Cape Yakataga, Cold Bay, Fort Yukon, Iliamna, Kenai, King Salmon, Lake Minchumina, Level Island, McGrath, Middleton Island, Moses Point, Nome, Northway, Skwentna, Talkeetna, Tanana, and Unalakleet were reviewed.

FY04 Response Fund Expenditures: \$ 22,349.41

FY04 Cost Recovery: \$ 0.00

In April 2004, the FAA signed a formal Memorandum of Agreement (MOA) with the Department to pay all billings for project management through FY06, estimated at \$100,000 per year.

FY05 Estimated Actions and Expenditure Amounts:

DEC oversight was provided for FAA sites at Biorka Island, Bettles, Cape Yakataga, Cold Bay, Gulkana, Iliamna, Johnstone Point, Kenai, King Salmon, Lake Minchumina, Level Island, McGrath, Middleton Island, Moses Point, Nome, Northway, Skwentna, Talkeetna, Tanana, and Unalakleet.

Estimated FY05 Expenditures: \$ 0.00**

FY05 Cost Recovery \$ 0.00

** No longer charged to Response Fund; now covered by the MOA between DEC and FAA

Project/Site Name: **Fairbanks Area Wide Industrial Reclamation (FAIR) Project**

Location: Fairbanks, AK

Project Manager: Janice Wieggers

Tel: (907) 451-2127

Site ID Number: Not Available

Tracking Number: 14870060

Situation:

The FAIR project is a pilot-scale study evaluating the use of Geographical Information Services (GIS) and areawide assessment in ADEC's Contaminated Sites Program. The purpose of the project is to facilitate ADEC management efforts and to ensure that risks to the public and the environment have been effectively evaluated at all sites. The FAIR project outcome will be a Risk Management Plan that functions as a framework for contaminated site assessment, remediation, and closure on an areawide basis instead of a site-by-site basis.

The FAIR project area consists of approximately 45 sites that have petroleum and/or solvent contaminants in the soil and/or groundwater. Parties responsible for this contamination include the Alaska Railroad, railroad lease holders, underground storage tanks (UST) owners and operators, and private businesses. Much of the groundwater contamination in this area has co-mingled, which complicates the assessment and remediation efforts conducted by the responsible parties, as well as ADEC's site management efforts.

FY03 Actions:

Two contracted investigations were completed in 2001/2002 to continue historical and physical site characterization efforts and to establish current groundwater contaminant levels within the FAIR study area. The first contract included a historical review to identify potential sources and a wellpoint investigation and groundwater monitoring event to identify current conditions and further assess groundwater in areas where there was insufficient data. The second contract installed permanent groundwater monitoring wells and conducted a groundwater monitoring event to identify groundwater contaminant conditions at boundary locations within the study area.

The EPA Office of Underground Storage Tank (OUST) contracted with Booz Allen Hamilton to develop a Risk Management work plan for the FAIR Study Area. The EPA contribution to this project was \$25,000. The work plan was completed on September 30, 2003.

FY03 Response Fund Expenditures: \$ 22,456.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions and Expenditures:

Responsible parties paid for areawide sampling and site characterization efforts. No Response Fund expenditures.

FY05 Projected Actions and Expenditures

Implement the FAIR Risk Management work plan. Identify appropriate area-specific data with which to calculate action levels and develop guidance for use of these levels. Implementation of the work plan and the resulting guidance will be used as a prototype for other areawide projects throughout the state. This effort will be coordinated with the EPA's Technical and Innovation Program.

Estimated FY05 Expenditures \$25,000

Project/Site Name: **F/V American Eagle**

Location: Lower Cook Inlet; near Russian Point at the entrance to Port Graham, Alaska

Project Manager: Gary Folley

Tel: (907) 262-5210, x234

Site ID Number: 03239917601

Tracking Number: 14107960

Situation:

On June 25, 2003, the fishing tender American Eagle capsized in lower Cook Inlet near Russian Point at the entrance to Port Graham. An estimated 400 gallons of diesel fuel was reported to be on board the vessel at the time. The accident occurred in close proximity to commercial set-gillnet sites and, as a result, The Alaska Department of Fish & Game closed the fishery for the Port Graham sub-district.

FY03 Actions:

The State initiated an emergency contract with the Seldovia Oil Spill Response (SOS) Team to contain and control the discharge of diesel fuel from the vessel. Response equipment, including oil containment boom, from the State's recently staged response connex in Seldovia was used. In addition, SOS provided logistical support for shoreline and resource assessment activities.

FY03 Response Fund Expenditures: \$ 51,664.00

FY03 Cost Recovery: \$ 0.00

FY 04 Actions:

The SOS Team continued to provide oil containment and control services for the State until July 2, 2003 when the American Eagle was taken in tow from Port Graham and scuttled at a location 12 miles offshore. This action took place in accordance with approval from the U.S. EPA after all diesel fuel, lubricating, and hydraulic oil was removed. Contaminated sorbent material was temporarily stored in Seldovia, and the State issued a "Notice to Proceed" to Philip Services Corp. for disposal. Pickup was accomplished on September 12, 2003. The cleanup and cost recovery action of this spill is now complete. Site closed.

FY04 Response Fund Expenditures: \$ 8,683.76

FY04 Cost Recovery: \$ 65,003.00

Project Site Name: **F/V Genei Maru No. 7**

Location: Afognak Island, Alaska

Project Manager: Harry Young

Site ID Number: 02249931401

Tel: (907) 269-7542

Tracking Number: 14103260

Situation:

The F/V Genei Maru No. 7 was discovered Sunday morning, November 10, 2002 partially burned, abandoned and aground on Cape Kazakof on Afognak Island by a local fisherman who then reported it to the Coast Guard. The Coast Guard reported the spill to the Alaska State Troopers. Coast Guard Marine Safety Detachment (MSD) Kodiak personnel over flew the vessel later that day and found the vessel hard aground against a cliff at Cape Kazakof. A rainbow sheen was emanating from the starboard side of the vessel. The MSD again over flew the site Monday November 11th, landing and photographing at least three holes in the port side of the vessel (the port side is up against the cliff and not visible from the air). No oil was observed emanating from the vessel Monday but a strong smell of diesel was evident.

The F/V Genei Maru No. 7 was a 97 foot, 140 gross ton "Gig Vessel" (fishing vessel used to catch squid). On May 27, 2002, while fishing in the Pacific Ocean about half way between the United States and Japan (39-24N, 172-2W), the vessel caught fire and was abandon by the crew. The crew was rescued by other fishing vessels with no U.S. involvement. On June 1st the vessel was presumed sunk. The vessel was then sighted 450 nautical miles west of Queen Charlotte Island, British Columbia on October 6th and again on October 15th at 53-12N, 145-51W. Further locations of the vessel were unknown until it was found hard aground November 10, 2002.

FY03 Actions:

ADEC and Coast Guard personnel met Monday, November 11th to plan response actions. As a result of this meeting, a USCG Marine Inspector, Crowley Maritime Services and Foss Environmental Services personnel conducted a vessel survey on November 13th. The forward fish hold above the number 1 Port and Starboard double bottom tanks had been converted to a supplementary fuel tank containing about 6,000 gallons of number 2 diesel fuel. Number 1 port and starboard tanks double bottoms were breeched. Some fuel remained on top of water bottoms in these tanks. The fish hold aft of the number 1 tanks had a thin layer of oil estimated at about 175 gallons. Some tanks were unable to be sounded due to breaking waves over the starboard quarter of the vessel.

A Unified Command was established under the Incident Command System in Kodiak with ADEC, USCG and representatives of the Ship's owners to manage the incident.

The cleanup revolved around weather windows and was hindered by safety issues. Access by sea was limited to calm weather. The Landing Craft Cape Douglas was used to lighter about 6000 gallons of the fuel on November 15th, however subsequent heavy seas prevented further direct lightering. Operations shifted to helicopter access provided by Maritime Helicopters (Homer and Kodiak) to the headlands above the wreck. A forty-foot ladder was rigged between the top of the cliff and the vessel providing land access. ADEC and DNR communications equipment was used to provide communications between Kodiak and Afognak Islands. The vessel had a fifteen to twenty degree list which made working on the vessel, especially when the decks were wet, very dangerous. The vessel would also become "lively" during periods of heavy seas and high tides mandating the removal of workers. The Alaska Army National Guard provided emergency tents and supplies on the shore adjacent to the wreck site should personnel become stranded due to weather. Crews from Foss Environmental Services subsequently removed all of the hazardous material including hundreds of mercury vapor lamps, plastics and fishing gear. The anhydrous ammonia refrigeration system was confirmed empty. 5,000 lbs of squid, reported to be aboard the vessel, were never found although it is suspected that the squid were in a lower freezer which had been breeched during the grounding. The remaining fuel and lubricants were drummed and sling loaded by helicopter to the Landing Craft Cape Douglas during a period of favorable weather. Magone Marine, Dutch Harbor, removed the wreckage under the oversight of DNR and ADEC. Cost recovery and penalty assessment has been completed.

FY03 Response Fund Expenditures: \$ 26,198.00

FY03 Cost Recovery: \$ 41,233.00

Project/Site Name: Gaffney Road Area-Wide Groundwater Investigation

Location: Fairbanks

Project Manager: Larry Johnson, Fairbanks

Tel: (907) 451-5175

Site ID Number: 9731090550

Tracking Number: 14622260

Situation:

Decades of commercial/industrial use in the area of Gaffney Road, in the City of Fairbanks, has resulted in area-wide groundwater contamination by chlorinated hydrocarbons, primarily tetrachloroethylene (PCE) and its daughter products- trichloroethene and the dichloroethenes. Groundwater investigations from 1997 to 1999 used passive soil gas (PSG) studies, temporary and permanent monitoring wells, and sewer line sampling to delineate two plumes above maximum contaminant levels (MCLs) originating in the Gaffney Road area and extending downgradient, generally north-northwest. The smaller, eastern plume exceeds 600 feet while the longer, western plume exceeds 3000 feet in length. The distribution of contaminants appears to be associated with the sanitary sewer lines in the area.

The western plume's groundwater contamination migrated towards the Golden Heart Utility (GHU) wells that supply water to city residents. Groundwater monitoring in 2002 and 2001 indicated a stable plume that does not reach the wells. According to results of a DEC well search, there are a small number of private wells in the area, but none are used for drinking water. Evidence to date indicates possible natural degradation of PCE and its breakdown compounds occurring in the groundwater since concentrations decrease from the Gaffney Road area toward the GHU wells. The highest concentrations were found in the western plume near Gaffney Road.

FY03 Actions:

Long term monitoring of twenty four groundwater wells for PCE and its breakdown products was completed in October 2002. Natural attenuation parameters were taken again from all designated monitoring wells. Conditions for natural attenuation are consistent with the previous results, indicating that limited natural attenuation is probably occurring. Both groundwater plumes appear to be generally stable, with some fluctuations in concentrations of a few wells.

FY03 Response Fund Expenditures: \$ 41,803.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Four new groundwater monitoring wells were installed to replace lost or damaged wells. A total of 29 wells were sampled in October 2003 for PCE and its breakdown products to assess plume stabilities. Further assessment of the indoor air pathway was conducted using passive soil gas sampling and limited indoor air sampling within two businesses located above the highest concentrations of the western plume. Results from the soil gas, indoor air, and groundwater analyses were compared to determine the risk of indoor air contamination. Also, efforts to facilitate a land sale resulted in the development of a work plan for a source area on the Stansberry property.

FY04 Response Fund Expenditures: \$ 90,507.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The groundwater monitoring program will continue. Review of work plans for additional soil investigation and possible remedial action is anticipated on the Stansberry property.

Estimated FY05 Expenditures: \$ 45,000.00

Project/Site Name: **Kaltag School Oil Seep**

Location: Kaltag, Alaska

Project Manager: David J. Pikul

Site ID Number: 1986310123001

Tel: (907) 269-7551

Tracking Number: 14937660

Situation:

The contamination problem at the Kaltag School is predominately Diesel Range Organic (DRO) contamination from years of overfilling and leaking from aboveground storage tanks owned by Yukon Kuskokwim School District (YKSD) and Alaska Village Electric Company (AVEC). Contaminant migration has occurred in the form of groundwater seepage adjacent to the school and downgradient at the site boundary. Interim remedial actions have been employed through installation of seepage collection trenches in combination with water scrubber units to treat seepage water before discharge. Cleanup of the site can not be completed until AVEC addresses upgrade of their tanks, relocation of the power generation facility, and investigation/cleanup of associated contamination. ADEC will continue to maintain and operate the seepage collection systems under the MOA until AVEC/Denali Commission efforts can be employed.

ADEC has completed some site characterization, identified sources of fuel contamination, installed and operate seepage control systems, and constructed and landfarmed a biocell for treatment of excavated hydrocarbon-contaminated soil.

FY03 Actions:

ADEC continued operation and maintenance of the interceptor trench/scrubber filtration systems in the vicinity of the school; and continued operation and maintenance of the biopile soil remediation cell. Groundwater monitoring was continued to assess the effectiveness of the interceptor trench and interim removal actions. ADEC coordinated with AVEC and Alaska Energy Authority to move the site under Denali Commission work. ADEC attended community meetings to notify the village as to the status of the site work.

FY03 Response Fund Expenditures: \$ 16,070.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Continued to operate and maintain the interceptor trench/scrubber filtration systems.

FY04 Response Fund Expenditures: \$ 18,808.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to continue to operate and maintain the interception trench system. AVEC reportedly may relocate the tank farm and active cleanup of soil at the school could occur but actual soil cleanup is most likely in FY 06.

Estimated FY05 Costs: \$25,000.00

Project/Site Name: **LDF (GC-1) Flow Line Spill**

Location: BPX Y-36 Flow line

Project Manager: Walt Sandel

Site ID Number: 03399914701

Tel: (907) 451-2126

Tracking Number: 14100360

Situation:

External corrosion of a transfer line caused an estimated 6000 gallon release of crude oil and salt water onto ice and snow covered tundra. The ruptured line occurred in the pipeline culvert where the pipeline exits a caribou crossing constructed of gravel. The release covered an area of about 1 acre.

FY03 Actions: The contaminated snow and ice was melted with warm water. The contaminated area was warm water flushed to remove the oil, and to dilute the salt water. The contaminated water was then vacuumed into trucks, and was injected down class II wells for disposal.

FY03 Response Fund Expenditures: \$ 15,998.00

FY03 Cost Recovery: \$ 0.00

FY 04 Actions: The cleanup is complete, an enforcement action is currently under investigation. ADEC personnel continued to monitor the effected area to determine if there are any long term effects to the tundra vegetation.

FY04 Response Fund Expenditures: \$ 0.00

FY04 Cost Recovery: \$ 31,708.00

Project/Site Name: **M & M Enterprises - Wyoming Drive**

Location: Anchorage, Alaska

Project Manager: Rich Sundet

Tel: (907) 269-7578

Site ID Number: 1987210912701

Tracking Number: 14670960

Situation:

M&M Enterprises processed scrap metal and old automobile batteries at the above-referenced property. The facility was originally investigated because of a complaint that cited inappropriate discharge of wastes at the site. A monitoring well was installed at the site in 1991. Elevated concentrations of metals were detected during this assessment. The following maximum metal concentrations were detected in soil samples collected at the site: lead at 84,000 milligrams per kilogram (mg/kg), arsenic at 78 mg/kg, total chromium at 32.1 mg/kg, and mercury at 10.29 mg/kg. In addition, total petroleum hydrocarbons (TPH) were detected at 24,800 mg/kg. Concentrations of mercury, cadmium, lead, and total chromium in groundwater were found to exceed drinking water maximum contaminant levels. In addition, TPH was detected in groundwater at a concentration of 0.28 milligram per liter.

FY03 Actions:

No action in FY03.

FY04 Actions:

The FY04 work provided a site investigation to determine the nature and extent of contamination.

FY04 Response Fund Expenditures: \$ 15,179.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to further define possible source areas and determine future monitor and/or corrective actions.

Estimated FY05 Costs: \$65,000.00

Project/Site Name: **Markair Dillingham Airport**

Location: Dillingham, Alaska

Project Manager: David Pikul

Tel: (907) 269-7551

Site ID Number: 1992250135701

Tracking Number: 14115960

Situation:

Alaska Department of Transportation and Public Facilities (ADOT&PF) identified an underground fuel tank on the former Markair site at the Dillingham Airport. Since ADOT&PF was addressing the closure of the Markair facilities statewide under a bankruptcy settlement agreement, the tank was not included in the agreement.

ADEC agreed to assist in the investigation and cleanup of this site by providing funds to remove the tank to facilitate further site investigation and cleanup actions.

FY03 Actions

No action in FY03.

FY04 Actions:

The FY04 work was to remove the underground fuel tank from the former MarkAir facility.

FY04 Response Fund Expenditures: \$ 46,314.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to further characterize (and cleanup) any contamination.

Estimated FY05 Costs: \$45,000.00

Project/Site Name: **Markair Nome Airport**

Location: Nome, Alaska

Project Manager: David Pikul

Tel: (907) 269-7551

ReckeyNumber: 1997320120201

Tracking Number: 14803160

Situation:

Alaska Department of Transportation & Public Facilities (ADOT&PF) identified an underground fuel tank on the former Markair site at the Nome Airport. Since ADOT&PF was addressing the closure of the Markair facilities statewide under a bankruptcy settlement agreement, the tank was not included in the agreement.

ADEC agreed to assist in the investigation and cleanup of this site by providing funds to remove the tank to facilitate further site investigation and cleanup actions.

FY03 Actions:

No action in FY03.

FY04 Actions:

The underground fuel tank from the former MarkA ir facility was removed.

FY04 Response Fund Expenditures: \$ 14,049.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 may be to further characterize (and cleanup) any contamination.

Estimated FY05 Costs: \$ 45,000.00

Project/Site Name: **MP 3.7 Eklutna Lake Road Abandoned Drums**

Project Manager: John Brown

Tel: (907) 269-7688

Site ID Number: CAT# 04-121-10

Tracking Number: 14117460

Situation:

On February 25, 2004 ADEC staff receives a report of 3 abandoned drums located a mile post (MP) 3.7 Eklutna Lake road. ADEC staff arrived at the drum site and cleaned up a small spill related to the drum abandonment. One of the drums had large "A" spray painted on its side, which resembled a drum previously identified from an anonymous complaint received back on October 24, 2003 about the Foreign Engine and Repair Shop at Peters Creek possibly abandoning waste oil drums. ADEC staff assisted both the EPA and State Environmental Crimes Unit in the execution of a search warrant at the Foreign Engine Repair Shop and was able to determine through sample analysis that the facilities waste oil stream matched the oil in the abandoned drums on Eklutna Lake Road.

FY 04 Actions:

On October 24, 2003 ADEC staff received an anonymous report that the operator of Foreign Engine and Repair shop in Peters Creek had contracted with an unknown party to dispose of 8-10 drums of used oil and antifreeze. ADEC staff followed up on the complaint and took photos of what appeared to be waste oil drums located outside of the facility.

On February 25, 2004 ADEC staff received a report of 3 abandoned drums located a MP 3.7 Eklutna Lake road. ADEC staff arrived at the drum site and cleaned up a small spill related to the drum abandonment. One of the drums had large "A" spray painted on its side, which resembled one of the drums previously identified at the Foreign Engine and Repair shop at Peters Creek. Upon further investigation that same day it was determined that approximately 7 drums previously identified at the Foreign Engine and Repair Shop had been removed from outside the shop area, including the drum spray painted with an "A".

On February 27, 2004 ADEC contracted Emerald Alaska Inc. to sample and remove the 3 abandoned drums along side the road at MP 3.7 Eklutna Lake Road. On March 12, 2004 ADEC received confirmation from analysis reports that the waste oil in the drums were contaminated with chlorinated solvents, which required the drums be handled and disposed of as Resource Conservation and Recovery Act waste.

On March 12, 2004 ADEC staff executed a search warrant at the Foreign Engine and Repair shop at Peters Creek. Statements were taken by EPA and State Environmental Crimes staff. Emerald Alaska Inc. was contracted to complete the sampling of the oil waste streams at the facility. Additional ADEC staff personnel were used to complete the photo documentation of the facility. On March 16, 2004 ADEC staff received confirmation analysis from the samples taken during the execution of the search warrant of the oil waste streams identified at the Foreign Engine and Repair shop which were consistent with the samples taken from the abandoned drums found on February 24, 2004 at MP 3.7 Eklutna Lake Road.

On March 22, 2004 ADEC staff completed case referral to the Environmental Crimes Unit for the assistance in the preparation and initiation of criminal enforcement proceedings.

FY04 Response Expenditures:	\$11,589.00
FY04 Cost Recovery:	\$ 0.00

Project/Site Name: **Moe Property (a.k.a Skagway State Street)**

Location: Skagway, Alaska

Project Manager: Anne Marie Palmieri

Site ID Number: 1998110132201

Tel: (907) 766-3184

Tracking Number: 14692260

Situation:

Free product (diesel fuel) was found floating on shallow groundwater in the southeast corner of a vacant lot owned by Mary Lou Moe. She conducted a preliminary site characterization, which indicated the contamination appeared to be flowing onto her property from the right-of-way. ADEC has undertaken site characterization work to determine the source and extent of fuel contamination and to identify the responsible party(ies).

FY03 Actions:

Additional soil borings and monitoring wells were installed and sampled. Free product recovery was evaluated. The extent of contamination has been better defined and the source has been narrowed down to the northwest portion of the Moe property or the adjacent property to the west. However, the contractor was not granted access to the adjacent property and overhead utilities limited sampling in other upgradient locations. Free product recovery was determined to be impracticable, less than 1 gallon of fuel was recovered over a six week period.

FY03 Response Fund Expenditures: \$ 83,541.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Soil borings were advanced along the northwestern side of the Moe property and on the adjacent properties to the north, northwest, and southwest. Low level contamination was found on the downgradient southwestern property and no contamination was found either north or northwest (upgradient) of the Moe property. ADEC has made a determination that the contamination source is located on the Moe property. Mrs. Moe was notified of this determination in writing, through her attorney, and informed that she will be responsible for reimbursing the State's costs.

FY04 Response Fund Expenditures: \$ 37,868.28

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

ADEC will negotiate cleanup levels and corrective action with Mrs. Moe. Mrs. Moe will bear the responsibility of funding the cleanup.

Estimated FY05 Expenditures: \$ 0.00

Project/Site Name: Nikiski Airstrip

Location: SW1/4, Section 36, T8N, R12W, S.M., Niksiki, Alaska

Project Manager: Don Seagren

Telephone: (907)262-5210 (ext 233)

Site ID Number: 1989230905912

Tracking Number: 14949660

Situation:

The site was formerly owned by the State of Alaska but transferred to the Kenai Peninsula Borough. It was used as a public airstrip from the 1960's through the 1980's. There were two areas located adjacent to the airstrip used as unpermitted disposal areas. One of the areas was used to dispose of petroleum products (bunker C and other waste petroleum) and the other was primarily a solid waste disposal area.

The site investigations to date have been limited to soil borings, installation of monitor wells and soil and groundwater samples. There was free phase product identified in 1994. It was concluded that product recovery and/or groundwater treatment would be difficult and expensive. A water well search did not identify any drinking water wells impacted by the sites.

A risk assessment to evaluate the human health and environmental risks posed by the contamination was proposed. However, the hydrogeology of the area was not fully defined resulting in the need for more information prior to evaluating the risks.

FY03 Actions:

No action in FY03.

FY04 Actions:

FY 04 work included additional characterization actions to further define soil and groundwater contamination. The report was completed and was submitted to DEC for review.

FY04 Response Fund Expenditures: \$ 107,120.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The FY 05 proposed work plan is to review the characterization report and determine whether a risk management decision could be prepared. Continued groundwater monitoring would be required.

Estimated FY 05 Costs: \$45,000.00

Project/Site Name: **Pedro Bay Dena'ina School**

Location: Pedro Bay, Alaska

Project Manager: David J. Pikul

Site ID Number: 1993250101502

Tel: (907) 269-7551

Tracking Number: 14896460

Situation:

Extensive soil and groundwater contamination has resulted over the years due to poor storage practices and releases from leaking aboveground storage tanks. Contaminants include Benzene, Gasoline Range Organic (GRO), and Diesel Range Organic (DRO) petroleum hydrocarbons. The Department conducted a site assessment at the facility in 1998, which documented extensive soil contamination in the schoolyard, and around the tank farm.

During the spring of 1999, groundwater contamination migrated into a creek that drains into Lake Iliamna causing extensive sheens and concern for the salmon fishery in the area. The contaminated groundwater seepage into the creek became evident after a petroleum spill was discovered at the tank farm. The spill appears to have been caused by an earthquake that registered 5.5 on the Richter scale, as well as the buildup of ice in the tank farm area.

Interim remedial actions were employed during 2000 and 2001 to minimize contaminant migration impacts to the environment. Groundwater interception and treatment systems have been installed to capture and treat groundwater prior to entering Lake Iliamna. Lakeside and creek bed sediments and soil have been impacted from releases from the site. Tank farm soils remain in the ground and require cleanup as they are a continuing source of contamination.

During the winter 2000/2001, the warm winter climate resulted in excessive surface water runoff, which in turn overwhelmed the groundwater treatment system. In addition, the increased surface water runoff resulted in ponded water conditions under the school building creating an indoor air quality problem in the school. DEC coordinated with the State Fire Marshal, Department of Labor and Department of Epidemiology to provide the Lake & Peninsula School District (L&P) with any health risk information regarding re-occupancy of the school. The school was evacuated until air quality conditions could be improved. Indoor air quality monitoring was required and conducted. L&P acted under State direction and contracted an industrial hygienist to test the school air quality.

Continued indoor air sampling and operation of the exhaust blower for the school building crawl space. Met with community members during indoor air quality monitoring performed by EHS Alaska. Described process and discussed related issues. Groundwater treatment system was redesigned and a cover designed and installed over tank farm soils. Water treatment system is operational and free product has been recovered from sumps. Installed well points at the base of the former tank farm. Inventoried equipment.

FY03 Actions:

A pilot study of the on-site remedial systems was conducted to determine the best remedial method for site cleanup. The systems included soil vapor extraction, air injection, air sparging and filtration of groundwater. Vertical PVC pipe(s) within the tank farm soils were exposed and retrofitted to allow collection of in-situ water. Components of the groundwater treatment system will require cleaning and maintenance.

FY03 Response Fund Expenditures: \$ 42,632.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions and Expenditure Amounts:

No remedial action taken in FY04.

FY04 Expenditures: \$0.00

FY 04 Cost Recovery: \$0.00

FY 05 Projected Actions and Expenditure Amounts

Excavate and treat soil.

Estimated FY 05 Costs:	\$75,000.00
------------------------	-------------

Project/Site Name: **Peters Creek / Sandens Fuel**

Location: Peters Creek, Alaska

Project Manager: Rich Sundet

Tel: (907) 269-7578

Site ID Number: 1998210000701

Tracking Number: 14972661

Situation:

The report of contamination in several drinking water wells in the Peters Creek area (approximately 20 miles north of Anchorage) was first received in 1986. The site was discovered to be caused by leaks from underground gasoline storage tanks at a former Tesoro Station located at the southeast corner of the Voyles Boulevard and the Old Glenn Highway intersection.

Three wells to recover gasoline product from the groundwater were installed on site, and approximately 250 gallons of product was recovered. A soil vapor extraction system was also installed to recover vapor phase contamination. The tanks and petroleum contaminated soil were removed in 1993.

Residences in the area were connected to a municipal water system the year contamination was discovered. A 1994 risk assessment prepared for the area concluded that the hazards and/or risks posed by the contamination were relatively low and did not warrant further remedial action.

FY03 Actions:

No action in FY03.

FY04 Actions:

The FY04 work provided additional sampling to verify current water quality conditions and an inspection of the monitor wells.

FY04 Response Fund Expenditures: \$ 46,190.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to evaluate the nature and extent of the groundwater plume and determine future monitor and/or corrective actions.

Estimated FY05 Costs: \$45,000.00

Project/Site Name: Prescott Equipment – Rampart Drive

Location: Anchorage, Alaska

Project Manager: Rich Sundet

Tel: (907) 269-7578

Site ID Number: 2001210928401

Tracking Number: 14896860

Situation:

The property is located at 2774 Rampart Drive, Anchorage, Alaska and consists of approximately 1.88 acres. In October 2001, ADEC received notice from the Law Offices of James H. McCollum, LLC provided on behalf of Prescott Equipment, Inc., that trichloroethene in groundwater was discovered in excess of ADEC cleanup levels.

In fall 2002, the Municipality of Anchorage (MOA) performed a groundwater investigation on the adjacent MOA property. That investigation found that TCE was detected in the groundwater in two of the three monitoring wells.

In spring 2003, Prescott Equipment performed a soil vapor investigation on the Prescott Equipment and MOA property. The investigation was inconclusive since TCE was detected in some areas along the property line between the MOA property and the property immediately west of the MOA property using field screening devices.

In spring 2003, Prescott Equipment, the MOA and the former tenants of the MOA property, i.e., the Alaska Army National Guard (AKARNG), were requested to pursue further investigation of the groundwater contamination. The parties declined to perform any further investigation.

The source(s) of TCE groundwater contamination at the Prescott Equipment Pipeyard is undefined. The adjacent MOA property is impacted also and the source(s) may be originating from an up-gradient source(s). It is also possible that the Prescott and MOA properties may be contributing to the groundwater contamination.

FY03 Actions:

No action in FY03.

FY04 Actions:

The FY04 work provided a groundwater investigation to determine the nature and extent of groundwater contamination. The plume is localized in the area of these properties and does not pose an imminent risk.

FY04 Response Fund Expenditures: \$ 46,190.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to further define possible source areas and determine future monitoring and/or corrective actions.

Estimated FY05 Costs: \$45,000.00

Project/Site Name: **Red Dog Mine Fugitive Dust Project**

Location: Near Kivalina

Project Manager: Rich Sundet

Tel: (907) 465-5208

Site ID Number: 1991320926601

Tracking Number: 14864860

Situation:

Red Dog Mine is located about 20 miles south of Kivalina. The mine is one of the world's largest zinc and lead mines. The port and mine sites are owned by NANA Corporation, the road is owned by Alaska Industrial Development and Export Authority (AIDEA) and the road passes through the Cape Krusenstern National Monument. Ore is processed at the mine, which is located about 50 miles from the ocean, and transported by covered trucks to storage buildings at the port. During the open water period, the ore concentrate is moved by conveyor from the buildings to barges, and transported from the barges to 3.0 miles off shore and placed into larger vessels. Elevated levels of zinc and lead were detected along the road between the mine and port in 1991. Subsequent investigations have determined that fugitive dust from the transportation of the ore concentrate between the mine and the port has resulted in contaminating those areas and along the 52 mile connecting road for zinc, lead and cadmium above background levels. In 2001, Teck Cominco, the operator of the mine elected to perform a risk assessment to determine whether the contamination poses a risk to human health and the environment.

FY03 Actions:

DEC reviewed and evaluated plans submitted by Exponent on behalf of Teck Cominco for further characterization of the port area and along the road transportation system. DEC and its term contractor Ecology & Environment (E&E) reviewed draft human health and ecological conceptual site models (CSMs). DEC approved the CSMs and public noticed a draft risk assessment workplan submitted by Exponent. During the public comment period, DEC held two public informational open houses at Kivalina and Noatak, and gave a presentation at the Alaska Forum in Anchorage. DEC and E&E developed comments on the draft risk assessment workplan. DEC also provided comments on a Phase I workplan developed to provide information on data gaps that were identified during the comment period regarding the draft risk assessment workplan. Teck Cominco planned to investigate physical data gaps such as lead concentrations in soil and biological data gaps in summer 2004 such as ptarmigan studies.

FY03 Response Fund Expenditures: \$ 32,239.00

FY03 Cost Recovery: \$ 46,502.00

FY04 Actions:

Written comments were provided to Teck Cominco regarding the draft risk assessment workplan and approved a plan to collect biological data to address data gaps in the risk assessment.

FY04 Response Fund Expenditures: \$ 56,304.63

FY04 Cost Recovery: \$.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to review the field data collected and formally provide written comments to Teck Cominco regarding the risk assessment.

Estimated FY05 Costs: \$45,000.00

Project/Site Name: **River Terrace Laundromat**

Location: Soldotna

Project Manager: Rich Sundet

Tel: (907) 269-7578

Site ID Number: 92230918701

Tracking Number: 14974360

Situation:

River Terrace RV Park (RTRVP) is an approximately ten-acre parcel located on the banks of the Kenai River in Soldotna. A dry cleaner operated on site beginning in the 1960s and ending in the 1980s. Currently the parcel is occupied by a trailer court, a recreational vehicle park and associated facilities, including a Laundromat. During a 1992 investigation of a complaint of leaking barrels, DEC discovered 22 barrels containing waste oil and hazardous substances, including one 55 gallon drum labeled "Perchloroethylene" (also known as tetrachloroethylene or PCE). At DEC's request, the owner had an environmental contractor remove the barrels. The site was characterized for soil and groundwater impacts based on its past use as a dry cleaning facility. The assessments identified soil contamination above ADEC cleanup levels for petroleum hydrocarbons and PCE. The groundwater monitoring results identified levels of PCE above the alternative cleanup level (ACL), established by DEC in August 1997. The property owner excavated and stockpiled contaminated soil (approximately 3,300 cy) on-site under EPA oversight. The stockpiled soil was treated on-site using a soil vapor extraction system (SVE). DEC assumed the lead role to investigate the site and performed a water quality and sediment investigation in the Kenai River adjacent to RTRVP. Furthermore, a Remedial Investigation/Feasibility Study (RI/FS) was prepared that further characterized the site and evaluated several remedial alternatives to treat the contamination. An interim treatment system to treat storm water discharge prior to it entering the Kenai River was installed. A Record of Decision established cleanup levels at the site and specified Hydrogen Releasing Compound (HRC) as the method to treat the groundwater. The injection would occur in a phased approach. A pilot study was performed to assist in evaluating the effectiveness of the HRC injection. It was determined to proceed with HRC treatment and install 56 HRC injection points under Phase I. An additional 51 injection wells were installed under Phase II. Groundwater and sediment sampling continued.

A pilot study was performed to assist in evaluating the effectiveness HRC injection. It was determined to proceed with HRC treatment and install 56 HRC injection points under Phase I. An additional 51 injection wells were installed under Phase II.

DEC continued to monitor the treatment at the site and evaluate trends in contamination in both the groundwater and the sediments in the Kenai River. In addition to cleanup activities, funding has been provided for legal advice on cleanup matters, litigation of the State's cost recovery action, and litigation to retain access to the site for the assessment and cleanup work.

FY03 Actions:

DEC reviewed and evaluated the quarterly groundwater data to determine the effectiveness of the HRC treatment. It is proposed to continue another phase of HRC injection and augment it with a biological treatment. Additional groundwater quality /sediment investigations will be conducted in the Kenai River. The treated stockpiled soils were spread on-site in June 2003.

FY03 Response Fund Expenditures: \$217,420.00

FY03 Cost Recovery: \$ 71,634.00

FY04 Actions:

The FY04 continued treatment of the contamination with HRC (or an equivalent hydrogen source) and evaluated bioaugmentation to accelerate the degradation process. Groundwater and sediments were monitored.

FY04 Response Fund Expenditures: \$206,014.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to continue to HRC treatment and evaluate natural degradation (versus bioaugmentation) based on the findings of the USGS laboratory studies.

Estimated FY05 Costs: \$195,000.00

Project Site Name: **Starrigaven Bay Sediments**

Location: Wrangell

Project Manager: William Janes

Site ID Number: 2002120921901

Tel: (907) 465-5208

Tracking Number: 14995760

Situation:

An Alaska Department of Transportation & Public Facilities (ADOT&PF) contractor documented elevated lead in clam samples in spring 2002. Follow-up clam sampling by DEC's Division of Environmental Health in August 2002 showed conflicting data.

FY 03 Actions:

A site data review and risk screening using existing information was completed by SLR Alaska.

FY03 Response Fund Expenditures: \$ 10,926.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

No action.

FY04 Response Fund Expenditures \$ 0.00

FY04 Cost Recovery \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

No action proposed.

Estimated FY05 costs: \$0.00

Project/Site Name: **Sterling ZipMart**

Location: Sterling, Alaska

Project Manager: Don Fritz

Site ID Number: 1995230028501

Tel: (907)262-5210 (Ext 245)

Ledger Code: 14662160

Situation:

The Sterling ZipMart was a vehicle fueling station that began operations in 1985. The original underground storage tank (UST) system consisted of two 10,000 gallon steel tanks with a single wall pipe leading to a dispenser island. In August-September, 1993, the pipeline system was upgraded to double walled piping. In August, 1995, a new 20,000 gallon, three-compartment tank was installed to replace the two original steel tanks. Prior to the tank upgrade, only gasoline was dispensed. After installation of the three-compartment tank, both gasoline and diesel fuels were available.

At the time of the 1995 tank upgrade activity, there was minor soil and groundwater contamination but no cleanup action was conducted because it was not reported as a significant problem. However, in December 2001, when Whittier Properties were closing the facility, additional assessment was conducted in order to evaluate the extent of the contamination.

The 2001 fieldwork (conducted initially by the Responsible Party (RP) under the ADEC Financial Assistance Program) identified significant soil and groundwater contamination associated with the piping and fuel dispensers. There was 13 inches of fuel product detected in two monitor wells installed in the 40-foot deep water table aquifer nearest to the fuel dispensers.

FY03 Actions:

DEC assumed the lead role on the project following the RP's indication that they were unable to continue. There were numerous monitor wells installed at the site and on properties adjacent to the Sterling ZipMart. The total extent of the contamination at the ZipMart facility has not been defined. The contamination is spreading in a southwesterly direction and poses a risk to several drinking water wells in the area, including the Sterling Elementary School. A free product recovery system was installed resulting in more than 10,000 gallons of product recovered. The department is also working on undertaking further assessment actions to better define the extent of free product and groundwater contamination, and the potential for impact to nearby wells.

FY03 Response Fund Expenditures: \$517,201.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

DEC continued to monitor the groundwater wells and sample the drinking water wells in the area. The investigation was expanded to further define the extent of the contamination. The product recovery system was operated and a soil vapor extraction system was evaluated.

FY04 Response Fund Expenditures: \$ 99,914.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

DEC will continue to monitor the groundwater wells and sample the drinking water wells in the area. The product recovery system will be operated and a soil vapor extraction system might be installed. DEC may also work with the residents to install treatment systems on their drinking water lines.

FY05 Projected Cost: \$675,000.00

Project/Site Name: **Stevens Village Old School**

Location: Stevens Village, Alaska

Project Manager: David Pikul

Tel: (907) 269-7551

Site ID Number: 1998310133601

Tracking Number: 14103060

Situation:

1998 field screening of stained soils in 9 locations on the old Bureau of Indian Affairs school grounds indicated petroleum impacts to surface soils in every location. Amount of contaminated gravel is estimated at 800-1500 cubic yards. School and tanks need to be removed prior addressing soil. Soil contamination at the school was investigated and characterized.

FY03 Actions:

No action in FY03.

FY04 Actions:

The FY04 work was to excavate and stockpile the impacted soil. There was contamination identified remaining in the ground but it was not practicable to remove more without disrupting the roadway.

FY04 Response Fund Expenditures: \$ 36,623.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The stockpiled soil will be treated and/or properly disposed.

Estimated FY05 Cost: \$50,000.00

Project/Site Name: **Tesoro Cook's Corner**

Location: Sterling, Alaska

Project Manager: Paul Horwath

Site ID Number: 1989230013701

Tel: (907) 262-5210, ext. 250

Tracking Number: 14951570

Situation:

Fuel contamination (primarily gasoline) was identified at Cook's Tesoro facility in 1989, as a result of the Alaska Department of Transportation & Public Facilities site assessment work during expansion of the Sterling Highway through Sterling, Alaska. The site is located on the north side of the Sterling Hwy., approximately Mile Post 82, about 950 feet north of the Kenai River and 1600 feet east of the Moose River.

ADEC hired a contractor to investigate the site in 1989, and interim cleanup measures were initiated in 1990. Contaminated soil was excavated to 20 feet below the ground surface, with approximately 3300 cubic yards of soil removed. The soil was treated and disposed of at John Cook's homestead property, about 8 miles east of the Cook's Tesoro facility. Following excavation there remained inaccessible areas of highly contaminated soil under and adjacent to the facility building and beneath the fuel tanks. Soil contamination also remained beneath the excavation area down to the groundwater at 25 feet.

FY 03 Actions:

The groundwater monitoring wells both on and offsite continue to be monitored. The dissolved phase plume extends across the Sterling highway and appears to be stable. There is no indication it is impacting drinking water wells or the Kenai River.

Two new monitoring wells were installed and two drinking water wells were sampled in December 2002. The purpose of this sample event was to determine if contamination was migrating towards the Kenai River and/or to drinking water wells downgradient from the Cook's Tesoro site. The sample results did not detect contamination in either of the new monitor wells or the drinking water wells. There were low levels (below regulatory cleanup levels) of benzene and toluene detected in a soil sample from one borehole but the quality of the sample is being evaluated. An effort was made to collect a ground/surface water sample along the shoreline of the river but water levels were too low. Another sampling event was performed on the two new monitoring wells and two drinking water wells in April, 2003 and no petroleum contamination was detected.

FY03 Response Fund Expenditures: \$ 16,772.00

FY03 Cost Recovery: \$ 2,600.00

FY04 Actions:

Cleanup and assessment work performed during FY04 was funded by the responsible party. No response fund expenditures were incurred during FY04.

FY05 Projected Actions and Expenditure Amounts:

The responsible party has submitted a work plan for the continued operation and maintenance of a groundwater treatment system, and continued groundwater quality monitoring, in FY05. Provided the responsible party continues to proceed with these necessary corrective action work tasks, no response fund expenditures are projected during FY05.

Project/Site Name: **Trailside General Store**

Location: Homer

Project Manager: Paul Horwath

Site ID Number: 99230011901

Tel: (907) 262-5210, ext. 250

Tracking Number: 14695860

Situation:

In the spring of 1999, gasoline emerged through fissures in the pavement around the Trailside General Store's underground storage tank systems. Trailside's contractors initially responded to the release and initiated cleanup actions, eventually excavating approximately 5000 cubic yards of soil. Trailside's contractor ceased all work on the project, claiming a lack of payment by Trailside in the spring/summer of 2000. The contractor left an open excavation at the site, and high concentrations of fuel remained in site soils. The Department of Law filed a lawsuit against Trailside. By the fall of 2000, it became clear that Trailside was not going to proceed with additional cleanup work at the site, in spite of repeated requests by the ADEC. ADEC hired a contractor to continue with the cleanup work at the site, and to stabilize the excavation site.

An ADEC contractor completed the excavation of highly contaminated soils at the site, and stabilized and filled in the cleanup excavation pit. A groundwater diversion system was installed to prevent contamination from migrating under the existing building on site. Excavated contaminated soils were transferred to the Homer Alaska Department of Transportation and Public Facilities (ADOT&PF) maintenance facility, for purposes of safe storage and future treatment.

Contaminated soils from the Trailside General Store site are currently stockpiled at the Homer ADOT&PF maintenance facility. A soil treatment contractor will be hired to treat and dispose of these soils.

FY 03 Actions:

A term contractor was hired to collect soil and groundwater site assessment samples, indoor air samples, and to evaluate the risk this site may pose to human health, welfare, and the environment. Soil and water samples were collected in June 2003. Although some petroleum contamination was detected, the concentrations did not depict a worsening condition. One of the groundwater monitoring wells was damaged, preventing the collection of a water sample. The indoor air samples could not be collected due to difficulty coordinating with the building owner. The installation of a replacement groundwater monitoring well and the collection of the indoor air samples were re-scheduled to occur in FY04.

FY03 Response Fund Expenditures:	\$ 15,767.00
FY03 Cost Recovery:	\$567,656.00
FY03 Settlement:	\$404,686.00

FY04 Actions:

ADEC's term contractor returned to the site and installed a replacement groundwater monitoring well. A groundwater sample and the indoor samples were collected. The indoor air quality was not deemed to pose a risk to occupant's health. The term contractor provided a report to ADEC covering the soil, groundwater, and air sampling activities, and recommended another indoor air sampling event, and continued groundwater quality monitoring.

FY04 Response Fund Expenditures:	\$ 7,806.00
FY04 Cost Recovery:	\$ 260,284.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to continue to monitor the groundwater quality at this site. Another indoor air sampling event is also projected during FY05.

Estimated FY05 costs:	\$ 15,000.00
-----------------------	--------------

Project/Site Name: **UAF Palmer Dump - Palmer Ag Research Center**

Location: 0.2 Trunk Road, Palmer, Alaska

Project Manager: David Pikul

Tel: (907) 269-7551

ReckeyNumber: 1993220929901

Tracking Number: 14967760

Situation:

The University of Alaska Palmer Research Center is located at mile 0.8 Trunk Road, Palmer, Alaska. The 1,500-acre facility has been in operation since approximately 1920. An unpermitted landfill (dump) was created on the property and information indicates it has been used for 50 years or so. Low level chlorinated pesticides have impacted relatively deep groundwater (80 feet). Minimal site characterization has been completed. Additional monitoring wells have been installed to conduct groundwater monitoring of the "dump" leachate.

A Notice To Proceed was issued to a term contractor to install a third monitoring well, collect groundwater samples for lab analysis, survey the wells and develop a site map depicting the groundwater gradient. Third monitoring well was installed and a report submitted to ADEC. The report review identifies a southeasterly groundwater flow direction. Downgradient wells have been impacted by chlorinated herbicides.

FY 03 Actions:

Three monitoring wells were installed downgradient of the known groundwater contamination to further characterize the plume. All site wells will be monitored to identify contaminant concentrations and migration.

FY03 Response Fund Expenditures: \$ 26,928.00

FY03 Cost Recovery: \$ 0.00

FY04 Actions:

Continuous monitoring of the groundwater.

FY04 Response Fund Expenditures: \$ 18,203.00

FY04 Cost Recovery: \$ 0.00

FY05 Projected Actions and Expenditure Amounts:

The proposed work for FY05 is to monitor the groundwater and possibly decommission wells based on the results

Estimated FY05 Costs: \$ 45,000.00

Project/Site Name: **Village Communities**

Location: Village of Mentasta Lake and vicinity

Project Manager: Toivo Luick

Site ID Number: 02309930701

Tel: (907) 451-2102

Tracking Number: 14886360

Situation:

On November 3rd, 2002 a strong earthquake on the Denali fault caused considerable damage to the communities along the Tok Cutoff. The village of Mentasta Lake was the hardest hit by the earthquake and many of the home heating oil tanks were thrown down from their stands and leaked into the ground. Within the village of Mentasta Lake over 2000 gallons of heating oil was spilled from several different 300 gallon tanks. A few smaller spills occurred elsewhere along the Tok Cutoff. The earthquake was declared a State and later a Federal disaster.

FY03 Actions:

A DEC responder as well as a representative from the Drinking Water program responded to the village immediately. Immediate actions included assessing environmental damage and collecting drinking water samples. Heavy equipment was hired from Tok, a term contractor (and their subcontractor) was activated in Fairbanks, and two more responders were activated from Anchorage. Responders worked with the contractors along the highway for several days restoring fallen and damaged tanks, and repairing ruptured heating oil lines, as well as cleaning up spilled fuel within the village of Mentasta Lake. Contaminated soils from the village were transported back to Oil Incineration Technologies in Moose Creek for thermal remediation. A lined area was set up at the Chistochina Department of Transportation yard to hold contaminated soils from home owners outside the village of Mentasta Lake who had spilled fuel from the earthquake.

FY03 Response Fund Expenditures: \$ 14,597.00

FY03 Cost Recovery: \$ 0.00

FY 04 Projected Actions and Expenditure Amounts:

No action in FY04. Project complete.

FY04 Response Fund Expenditures: \$ 0.00

FY04 Cost Recovery: \$ 0.00

Project Site Name: **Wrangell Institute**
Location: Wrangell, Alaska
Project Manager: Anne Marie Palmieri
Site ID Number: 1999130128001

Tel: (907) 766-3184
Tracking Number: 14646860

Situation:

The Wrangell Institute was constructed in the 1930s and used as a boarding school and rental housing until the early 1980s. Underground heating oil tanks were present at each building and connected to bulk tanks by an underground pipeline. Leaks occurred at many points along the pipeline and at most of the tank locations causing substantial soil and groundwater contamination. Some contaminated soil was excavated and stockpiled by the current landowner, the City of Wrangell. Past operators and owners, US Bureau of Indian Affairs, US Bureau of Land Management, US Forest Service, and the Cook Inlet Regional Inc. Native Corporation were unwilling to assist the City of Wrangell with cleanup when the City requested.

FY03 Actions

Excavation and stockpiling of contaminated soil was performed by CarsonDorn and paid for by the City of Wrangell. In spring of 2003 ADEC requested that CarsonDorn prepare a written report documenting the excavation and stockpiling of contaminated soil.

FY03 Response Fund Expenditures:	\$5,500.00
FY03 Cost Recovery	\$ 0.0

FY04 Actions:

DEC contracted to complete a final report for the City of Wrangell's second of two removal actions. With that information, DEC sent letters of Notification of Potentially Responsible Party status to all past owners and operators and asked for a complete characterization of the site. When all entities refused to conduct the characterization work, DEC characterized the site. Soil samples were collected from trenches and soil borings, and groundwater monitoring wells were installed and sampled. Surface water and sediment samples were collected to assess possible impacts to Shoemaker Bay and Institute Creek. The nature and extent of contamination at the site were determined.

FY04 Response Fund Expenditures:	\$ 92,401.37
FY04 Cost Recovery:	\$ 0.00

FY05 Projected Actions and Expenditure Amounts:

Negotiations with the Federal Government and CIRI are currently underway. It is anticipated that a cost-sharing agreement will be reached in the near future for the responsible parties to conduct corrective action as well as reimbursement of DEC past costs. No Response Fund expenditures are expected in FY05.

Project Site Name: **Wrangell Junkyard**
Location: Wrangell Byford Junkyard
Project Manager: William Janes
Site ID Number: 2000130910501

Tel: (907) 465-5208
Tracking Number: 14914360

Situation:

The Wrangell Junkyard is located on three acres on the uphill side of Zimovia Highway, about four miles south of Wrangell. The facility operated as a salvage yard from the early 1960s into the 1990s. The site is currently covered with derelict automobiles, miscellaneous scrap, drums, broken batteries, and a number of transformer casings. A partial cleanup was conducted in the mid-1990s to remove salvageable metal. The site was reported to ADEC by an adjacent landowner in 1999 as potentially contaminated.

FY03 Actions:

Reporting and sampling requirements for the second phase of characterization and waste inventory/removal/remedial cost estimate was completed by Ecology and Environment.

FY03 Response Fund Expenditures:	\$ 38,316.00
FY03 Cost Recovery:	\$ 0.00

FY04 Actions:

No action in FY04.

FY04 Response Fund Expenditures:	\$ 0.00
FY04 Cost Recovery:	\$ 0.00

FY05 Projected Actions and Expenditure Amounts:

No actions projected for FY05.

Estimated FY05 costs:	\$ 0.00
-----------------------	---------

OIL AND HAZARDOUS SUBSTANCE RELEASES

ALASKA STATUTES

Sec. 46.08.060. Report. (a) The commissioner shall make available a report to the legislature not later than the 10th day following the convening of each first regular session of the legislature. The commissioner shall notify the legislature that the report is available. The report may include information considered significant by the commissioner but must include:

- (1) the amount of money expended by the department under AS 46.08.040(a) during the preceding two fiscal years.
 - (2) The amount and source of money received and money recovered by or on behalf of the department during the preceding two fiscal years under
 - (A) AS 46.08.020; and
 - (B) AS 46.08.025;
 - (3) a summary of municipal participation in the department's responses that were paid for by the fund;
 - (4) a detailed summary of department activities in responses paid for by the fund during the preceding two fiscal years, including response descriptions and statements outlining the nature of the threat; in this paragraph, "detailed" includes information describing each personal services position and total compensation for that position, each contract in excess of \$10,000, and each purchase in excess of \$10,000; and
 - (5) the projected cost to the department for the next two fiscal years of monitoring, operating, and maintaining sites where response has been completed or is expected to be continued during the next two fiscal years.
- (b) As part of the department's on-going identification efforts associated with oil spill or hazardous substance release or waste sites, the commissioner shall include in the report under this section
- (1) the number of sites that are included in the department's contaminated sites data base, whether the site is active or closed; and
 - (2) a prioritized listing of those sites, both statewide and by community, based on the immediate and long-term threats to the public health or welfare or to the environment.
- (c) In addition to the department's report required under (a) of this section, the governor shall submit a report about use of the fund during the previous two fiscal years to the legislature not later than the 10th day following the convening of each first regular session of the legislature. In the report, the governor shall describe in detail the governor's use of money from the fund, with separate explanations, by agency, of the activities that were paid for under the authority of AS 46.08.045.
